Projects evaluation – Dynamics of Structures – 2024
Arnaud Deraemaeker and Yves Duchêne

The evaluation will take place on Wednesday May 15 and lasts for 30 min. Each group is asked to prepare:

- 12 slides (max) with the main results of the parasismic project. Make sure you are giving all values listed in the project presentation, last slide (points 1 to 4)
- 3 slides (max) for the wind project. Make sure you give all values related to point 2 in the overview document.
-

As written in the course sheets, if you did not participate to exercise sessions and evaluation, we will refuse your participation to the oral examination for the course, unless there is a very good reason for your absence, and you have contacted us in advance to discuss it.

Please register here to have a time slot (enter the **group number** and **three last names** of the students in the group in the Name field, for example Group 1 – Dupont, Durand, Johnson): https://calendly.com/arnaud-deraemaeker-1/30min

Each group should **send his/her presentation to me by email by Tuesday May 14 at midnight**.

The file **should be labeled as: GroupXX_DOS_project_2024.pptx** or .pdf (example: Group01_DOS_project_2024.pptx)

Each student should also **send the matlab/octave code used to produce the results**. The files should be named: GroupXX_DOS_project1.m for parasismic project and GroupXX_DOS_project2.m for the wind project. Do not forget to attach all files necessary to run the scripts (files containing matrices from FinElg, additional functions or subscripts, etc.)

If files are not labeled properly, you will not be allowed to present your project! No modification of the presentation or code will be allowed after the deadline for submission.
