1 Highlights

Give three bullet points that describe the essence of the research and highlight what is distinctive about it.

2 Originality

- Explain in a few lines why the study is innovative with respect to the existing body of literature.
- Please cite 3 recent papers that are directly related to your paper.

3 State of the art

- How do the proposed developments perform with respect to the state of the art in the structural dynamics community? For review papers, why is the review different and more insightful than previous reviews?
- To what extent do the developments advance the state of the art ?

4 Importance and timeliness

- Explain in a few lines why the study is significant to the structural dynamics community.
- Comment on the timeliness of the proposed developments. For review papers, why is such a review timely?

5 Contact

For any question you may have, please contact one of the two chief editors.
